ARYA ARAVIND

Full-Stack Developer | AI-Integrated Web Systems

Dubai, UAE • +971 50 126 4533 • aryaaravind1994@gmail.com • linkedin.com/in/aryaaravind1994 • aryaaravind.com

SUMMARY

Full-stack developer who designs and ships production AI systems end-to-end — from architecture to deployment. At Elysian Real Estate, built an autonomous pipeline that aggregates, structures, and publishes 2,900+ UAE off-plan projects to a live Next.js portal using the Claude API and Claude Code, with zero manual input. Eight years leading complete digital systems across real estate, manufacturing, and e-commerce in the UAE, working directly with CEOs and GMs to turn business requirements into shipped, production software.

SKILLS

AI & Automation: Anthropic Claude API, Claude Code, AI Automation Pipelines, Structured JSON Outputs, Zapier, RESTful APIs, Salesforce CRM, Mailchimp, JSON-LD Schema, Google Indexing API, Telegram Bot API

Languages & Frameworks: JavaScript, PHP, Python, Next.js, Astro, React, Laravel Filament, CodeIgniter, Flask, Tailwind CSS, Bootstrap, jQuery, HTML5, CSS3, Responsive Design, WordPress

Data & Infrastructure: PostgreSQL, MySQL, Supabase, Database Query Optimization, Cloudinary, Cloudflare Workers, Vercel, Digital Ocean, Linux/Server Management, DNS, SSL, Git/GitHub

SEO & Digital Presence: Technical SEO, Google Search Console, Google Analytics, Google Business Profile, Core Web Vitals, PageSpeed Optimization, Email Campaigns, Unbounce

Leadership: IT Operations Management, System Architecture Design, Hiring & Training, Cross-Functional Collaboration, Figma (Design Handoff), UI/UX Collaboration, Testing & QA

WORK EXPERIENCE

Lead Web Developer *Dec 2021 – Present*

Elysian Real Estate / Elysian Developments • Dubai, UAE

- Primary technologist for the company's entire web infrastructure, AI systems, and IT operations — building and running everything without a dedicated technical team.
- Migrated elysian.com from a React Vite SPA to Astro SSR on Cloudflare Workers, delivering full technical SEO (JSON-LD schema, geo tags, dynamic sitemaps, canonical URLs) and a Claude-powered chatbot that qualifies inbound leads and routes them into segmented Salesforce CRM groups by detected intent.
- Built a dual-path off-plan property data pipeline: an autonomous system that aggregates, deduplicates, and publishes 2,900+ UAE new-launch projects from multiple live sources — generating SEO/AEO copy, investment highlights, and FAQ schema via the Claude API, auto-uploading images to Cloudinary, and submitting to the Google Indexing API on a Telegram-bot-controlled schedule with zero manual input; and a PDF ingestion path using PyMuPDF, Playwright, and Claude to extract 80+ structured fields from developer brochures, reviewed through an 8-tab Flask dashboard before one-click publish to Supabase and a Next.js 14 portal.
- Used Claude Code as a primary development tool across the full Elysian stack — accelerating feature delivery, debugging complex systems, and building multi-step AI automation pipelines with structured JSON outputs via the Anthropic API.
- Delivered multiple full-stack websites (Elysian Developments, Emerge, Esme) using Laravel Filament, Astro, React Islands, and PHP, handling design, database integration, deployment, and maintenance end-to-end. Improved GTmetrix performance from Grade D to Grade B (1.0s LCP, 0 CLS) and reached 92/100 mobile PageSpeed SEO.
- Built an AI-powered lead automation pipeline using the Claude API, Zapier, and Mailchimp — routing leads from multiple platforms into Salesforce CRM with spam suppression — and engineered a Laravel/React admin dashboard integrating the Salesforce XML feed and live listings API for real-time property management.
- Managed all IT operations independently — Google Workspace, Cloudflare, Supabase, Cloudinary, Vercel, Digital Ocean, domains, SSL, and security audits — maintaining the company's full cloud infrastructure.

Full-Stack Developer *Aug 2019 – Dec 2021*

Biri Group Trading LLC • Dubai, UAE

- Only developer and IT lead across three sister companies spanning production, logistics, and e-commerce, working directly under the GM and CEO to translate business vision into functional systems.
- Built a heavy-data production and order management dashboard (PHP CodeIgniter, JavaScript, jQuery, AJAX, Bootstrap) with graph-based sales analytics and end-to-end order tracking, driving a 41% reduction in operational costs and an estimated 30–35% uplift in production efficiency.
- Developed a cargo booking and shipment tracking platform giving real-time visibility to internal teams and customers, reducing delivery delays by an estimated 25–30% and improving client retention.
- Engineered an automated milestone alert system linked to the production pipeline, eliminating manual follow-ups and accelerating fulfillment cycles.
- Launched a full-stack e-commerce platform with a secure payment gateway for the toy retail brand, establishing online sales as a primary revenue channel with consistent month-on-month growth.
- Directed IT operations across all entities — server security, DNS, infrastructure — while hiring and training IT staff to scale department capacity.

Web Developer & Digital Marketing Executive *Jan 2019 – Jun 2019*

Planworks Communications LLC • Dubai, UAE

- Collaborated directly with the CEO to align digital strategy with business growth goals, while independently building, revamping, and managing multiple company websites and admin dashboards using PHP CodeIgniter.
- Drove measurable increases in product inquiries and sales leads through SEO optimization, targeted keyword strategy, and Google Search Console indexing.
- Managed end-to-end digital presence including Google Business Profile, social media promotion, and Amazon seller listings, strengthening brand visibility and online revenue channels.

Junior Web Developer *Jan 2016 – May 2018*

Three Seas Infologics Pvt. Ltd • Kerala, India

- Developed and delivered scalable websites and dashboards for multiple clients using PHP CodeIgniter, Core PHP, WordPress, and MySQL, consistently meeting tight deadlines and contributing to high client retention.
- Built responsive, mobile-friendly web applications and converted existing platforms into Android-compatible solutions via REST API integration, expanding client digital reach.
- Collaborated across design and analyst teams to translate specifications into fully functional web solutions while managing simultaneous client projects.

EDUCATION

B.Tech, Computer Science Engineering *Aug 2011 – May 2015*
Amal Jyothi College of Engineering • Kerala, India

Higher Secondary, State Board *Jun 2010 – Mar 2011*
M.S.M.H.S.S • Kerala, India
